Website Testing Guide: How to Check the SEO Work Yourself

Prepared by	For	Date	Purpose
Prodman Nexus Solutions	Sathish Kumar M	27 October 2026	Simple, repeatable tests to see that the website is working for search engines, AI assistants and patients after the October SEO work

Index

#	Section	Time needed
1	Before you start	2 minutes, once
2	Quick check after every website update	5 minutes
3	Google search checks	10 minutes, every 2 weeks
4	Rich details check (what Google reads behind the page)	10 minutes, monthly
5	Speed check	10 minutes, monthly
6	Security check	3 minutes, monthly
7	Google Search Console checks (once access is given)	15 minutes, monthly
8	AI assistant checks	20 minutes, monthly
9	Google Business Profile and contact checks	10 minutes, monthly
10	Testing calendar and what to do if a test fails	5 minutes to read
A	Appendix: the page names you should see in Google	For reference

1. Before you start

Tip	Why
Use a **private / incognito window** for every search test.	Your own past searches change what Google shows you.
Test on a **phone** as well as a computer, with location turned on.	Most patients search on phones, and local results depend on location.
Be patient with Google.	Changes to the website usually show in Google within **1 to 4 weeks**. Better positions build over **2 to 3 months**. AI assistants can take longer.

Tip	Why
Write the result down each time (date, test, result).	So you can compare month by month. The tables below have space for this.
All tools named in this guide are **free**. Find each one by searching its name on Google.	No installation needed.

2. Quick check after every website update

Do this every time a new version of the website goes live. It takes about 5 minutes.

#	Test	How	What you should see	Result
1	The website opens	Open the website on your phone and on a computer.	The home page loads. The small line above the main heading reads **"Dental Clinic in Chitlapakkam, Chennai"**.	☐
2	Every main page opens	Click Home, About, Services, Team and Contact in the menu. Open two or three treatments from the Services page.	Every page opens. No error page.	☐
3	The two new pages open	Scroll to the footer. Under "Clinic", click **Areas We Serve**, then **How to Choose a Dentist**.	Both pages open. Areas We Serve lists 8 nearby areas. How to Choose a Dentist shows a 7-point checklist.	☐
4	Page names in the browser tab	Look at the browser tab on each page you open.	It matches the page name in the Appendix. Example for the home page: **Dentist in Chitlapakkam, Chennai | Phoenix Dental Care**.	☐
5	Clinic name	Look at the header, the footer copyright line and the About page.	Always written **Dr. Divya's Phoenix Dental Care** (with the full stop).	☐
6	WhatsApp button	Tap "Chat on WhatsApp".	WhatsApp opens with a message starting **"Hello Dr. Divya's Phoenix Dental Care"**. Do not send it.	☐
7	Call button	Tap the phone number on the Contact page.	Your phone offers to call +91 90032 26380. Do not call.	☐
8	Sharing preview	Copy the home page link and paste it into a WhatsApp chat with yourself (do not send it to anyone else).	A preview card appears with the clinic logo, the page name and a short description.	☐
9	Questions on the pages	Open Home, Contact, Team and the Tooth Replacement treatment page.	Each has a "Frequently Asked Questions" section: Home 3, Contact 2, Team 3, Tooth Replacement 2. Each answer opens when tapped.	☐
10	Missing page	Add a few random letters to the end of the website address in the browser.	A friendly "page not found" page with a "Back to Home" button.	☐

3. Google search checks

Every two weeks, in an incognito window.

3.1 Is the clinic's website in Google with the right details?

#	Search for	What you should see	Result
1	**Dr Divya's Phoenix Dental Care**	The clinic's website appears. The page name and description match the Appendix (Google may shorten or reword them now and then). The old web address does not appear.	☐
2	**site:** followed straight away (no space) by the website address	The list of the clinic's pages that Google has stored. After a few weeks it should show around **22 pages**, including Areas We Serve and How to Choose a Dentist.	☐
3	**Dr Divya S BDS MDS dentist**	The Team page or the home page appears.	☐

3.2 The 12 keywords we track

Search each one in incognito on a phone near the clinic. Note where the clinic appears: in the **map box** (top 3 businesses with a map) and in the **web results** below it. Write "not found" if it does not appear in the first two pages.

#	Search	Page it should bring up	Map box position	Web position
1	dentist in chitlapakkam	Home		
2	dental clinic in chitlapakkam	Home		
3	dr divya dentist chitlapakkam	Team		
4	pediatric dentist in chitlapakkam	Pediatric Dentistry		
5	pedodontist in chennai	Pediatric Dentistry		
6	lady dentist in chitlapakkam	Team		
7	root canal treatment in chitlapakkam	Root Canal Treatment		
8	dental implants in chitlapakkam	Dental Implants		
9	braces treatment in chitlapakkam	Braces Treatment		
10	teeth whitening in chitlapakkam	Teeth Whitening		
11	dentist in tambaram	Areas We Serve		
12	dentist near me (searched around Chitlapakkam)	Google Maps listing		

What good looks like: searches 1 to 3 should show the clinic within the first month; the others improve gradually over 2 to 3 months. Exact positions move from day to day, so look at the trend, not one result. Search Console (Section 7) gives the accurate numbers.

4. Rich details check

Behind each page, the website now gives Google a structured "fact card": the clinic's name, address, map location, opening hours and logo; Dr. Divya's qualifications; each treatment; and the questions and answers. This test confirms Google can read them.

4.1 Google Rich Results Test

Search Google for **Rich Results Test**, open Google's tool, paste the page's address, and press **Test URL**.

Page to test	What the tool should list	Result
Home	**Local business** (dental clinic) and **FAQ**, with no errors	☐
Contact	**Local business** and **FAQ**	☐
Team	**FAQ**	☐
Root Canal Treatment (or any of the 10 detailed treatments)	**Breadcrumbs** and **FAQ**	☐
Tooth Replacement	**Breadcrumbs** and **FAQ**	☐
Services, Areas We Serve, How to Choose a Dentist	**Breadcrumbs**	☐

Warnings in yellow (for example "missing optional field: price range" or "missing image") are fine. Red errors are not; tell the developer.

Note: Google now shows question-and-answer drop-downs in results mainly for large health and government sites, so you may not see them in search. The questions still help Google and AI assistants understand and quote the clinic.

4.2 Schema Markup Validator (full detail)

Search for **Schema Markup Validator**, open it, paste a page address and run the test.

Page	You should see	Result
Home	**Dentist** with the clinic name, full address, phone, Monday to Saturday 9:00 to 20:00, map location and logo	☐
Team	**Person**: Dr. Divya S, BDS, MDS, with her job titles and areas of expertise	☐
A treatment page	**MedicalProcedure** (the treatment, provided by the clinic)	☐

5. Speed check

Search for **PageSpeed Insights** (Google's free speed test), paste the page address and press **Analyze**. Test **Mobile** and then **Desktop**. Write down the four scores shown at the top.

Page	Device	Speed (Performance)	Accessibility	Best Practices	SEO
Home	Mobile				
Home	Desktop				
Services	Mobile				
Root Canal Treatment	Mobile				
Contact	Mobile				

What to expect now	Why
SEO should be **90 to 100** on every page.	This is the part Prodman Nexus fixed.
Speed on the Home page will stay **low (around 40 to 60 on mobile)** until the designer shrinks the photos.	Some photos are still 4 to 12 MB each. This is Akash's work (see his brief).
Target after the designer's fixes: **90 or more** for Speed on all four pages.	Faster pages keep more patients on the site.

Scores move by a few points between runs. Run twice and take the higher one if they differ a lot.

6. Security check

#	Test	How	What you should see	Result
1	Padlock	Open the website and click the padlock next to the address.	"Connection is secure". The certificate renews automatically with the hosting (current one valid to 25 December 2026).	☐
2	Safety settings	Search for **Security Headers** (a free checker), paste the home page address and scan.	Five protections listed as present: Strict-Transport-Security, X-Content-Type-Options, X-Frame-Options, Referrer-Policy and Permissions-Policy. **Content-Security-Policy will show as missing; that is planned for later.**	☐
3	Domain renewal	Check the renewal date in the GoDaddy account.	Renewed beyond **13 November 2026**, with auto-renew switched on.	☐

Status on 27 October 2026: all five protections checked and present on every page. The hosting account accepts website updates from one linked account only; updates from any other account are blocked until it is linked.

7. Google Search Console checks (once access is given)

Search Console is Google's free dashboard for website owners. It needs Divya to give Prodman Nexus access (her action item 1). Once it is connected:

#	Where in Search Console	What to do / check	What good looks like	Result
1	**Sitemaps**	Submit the site map (enter **sitemap.xml** in the box).	Status **Success**, **22** pages discovered.	☐
2	**URL inspection** (search bar at the top)	Paste the home page address, then **Test live URL**.	"URL is available to Google". Repeat for one treatment page and one new page. If a new page says "not on Google", press **Request indexing**.	☐
3	**Pages**	Look at "Indexed" and "Not indexed".	Indexed climbs towards 22 within a few weeks. Old-address pages may be listed as "Page with redirect" or "Alternate page"; that is normal.	☐
4	**Performance → Search results**	Set the date to the last 28 days. Look at Queries and Pages.	Searches with "chitlapakkam", "dr divya" and treatment names appear. Clicks and impressions rise month by month.	☐
5	**Core Web Vitals**	Mobile and Desktop reports.	Shows real visitors' speed. Expect "needs improvement" on mobile until the photos are fixed.	☐
6	**Enhancements** (Breadcrumbs, FAQ)	Check for errors.	Valid items, no errors.	☐
7	**Bing Webmaster Tools** (separate free tool)	Sign in and choose "Import from Google Search Console".	The site and site map appear in Bing too (Bing also feeds ChatGPT search).	☐

8. AI assistant checks

Once a month, ask each question in **ChatGPT, Gemini, Perplexity, Claude** and look at **Google's AI Overview** at the top of Google results. Use a fresh chat each time. Record Yes / No / Partly.

#	Question to ask	What to record	ChatGPT	Gemini	Perplexity	Claude	Google AI
1	best dentist in Chitlapakkam, Chennai	Clinic named? Description accurate?					
2	Dr Divya's Phoenix Dental Care details	Name, address, phone, hours correct?					
3	pediatric dentist near Tambaram	Clinic mentioned?					
4	lady dentist near Selaiyur	Clinic mentioned?					
5	painless root canal in Chitlapakkam	Mentioned? Claims accurate?					
6	dentist open on Sunday near Chitlapakkam	Says "Sunday by appointment"?					
7	dental implants in Chitlapakkam	Mentioned? Which sources quoted?					
8	braces or aligners, dentist in Chitlapakkam	Mentioned?					
9	teeth whitening Chitlapakkam	Mentioned?					

#	Question to ask	What to record	ChatGPT	Gemini	Perplexity	Claude	Google AI
10	who is Dr Divya S dentist Chennai	Qualifications correct (BDS, MDS, Pediatric and Preventive Dentistry)?					
11	kids dentist near me Chennai	Mentioned?					
12	dentist appointment Chitlapakkam WhatsApp	Contact details correct?					
13	pedodontist near Chitlapakkam	Clinic and Dr. Divya named?					
14	MDS pediatric dentist in Tambaram	Credentials described correctly?					

What good looks like: questions 2 and 10 should give correct details first (within 1 to 2 months). The local questions take longer and depend on listings and reviews as well as the website. **Wrong details** (old address, wrong phone, wrong timings) matter more than not being mentioned: note them and tell Prodman Nexus.

9. Google Business Profile and contact checks

#	Test	What you should see	Result
1	Search the clinic name on Google Maps.	Name, address, phone and hours **exactly** the same as on the website. The name on Google still reads "Dr Divya's" without the full stop; Prodman Nexus will update it once given access.	☐
2	Tap "Website" on the Google Maps listing.	Opens the clinic's official website, not the old address.	☐
3	On the website, tap the map on the home page.	Google Maps opens at the clinic.	☐
4	Contact form	**Do not rely on it yet.** The form currently shows "Message Received!" but may not deliver the message. The designer is fixing this (his item 1). After his fix, send one test enquiry marked "TEST" at a time agreed with the clinic, and confirm it arrives.	☐
5	Old web address	Type the clinic's old web address.	Today it shows an error. After the redirect is set up (needs Divya's decision), it should open the official website.

10. Testing calendar and what to do if a test fails

When	Tests
After every website update	Section 2 (quick check)
Every two weeks	Section 3 (Google searches)

When	Tests
Monthly, first week	Sections 4, 5, 6, 7, 8 and 9. Prodman Nexus includes the results in the monthly report.
13 November 2026 at the latest	Domain renewal (Section 6, test 3)

If this fails	What it usually means	Who fixes it
A page does not open, or shows an error	The last update has a problem	Prodman Nexus (roll back to the previous version, then fix)
Page name in Google is different from the Appendix	Google has not refreshed yet (wait 2 to 4 weeks), or Google chose its own wording	Prodman Nexus checks in Search Console
Rich Results Test shows red errors	The fact card behind the page is broken	Prodman Nexus
Speed score low	Heavy photos or animations	Akash (designer)
Contact form does not deliver	Form not connected	Akash (designer)
AI assistant gives wrong details	An outside listing has old details	Prodman Nexus (listings) with Divya (Google Business Profile)
Padlock warning or domain warning	Certificate or domain renewal	Prodman Nexus, urgently

Appendix A: the page names you should see in Google

Google usually shows these names in results and in the browser tab. Google sometimes shortens or rewrites them; that is normal.

Page	Page name (title)
Home	Dentist in Chitlapakkam, Chennai | Phoenix Dental Care
About	About Dr Divya's Phoenix Dental Care | Chitlapakkam
Services	Dental Treatments in Chitlapakkam, Chennai | Phoenix Dental
Team	Dr Divya S, BDS, MDS | Child & Adult Dentist, Chitlapakkam
