SEO & AEO Growth Plan — Dr Divya's Phoenix Dental Care

Prepared by	Prepared for	Website	Document
Prodman Nexus Solutions — Sathish Kumar M	Dr Divya S	https://drdivyaphoenixdental.com	How we will help more patients find the clinic — version 3 (client edition), 24 Oct 2026

Part of a set of three documents
1 · Website Health Audit — `audits/audit-2026-10-12.pdf` · 2 · Keyword Library — `seo/keyword-library-2026-10.pdf` · **3 · SEO & AEO Growth Plan —** `seo/seo-growth-plan-2026-10.pdf` (this document)

Index

#	Section	What you will find
1	At a glance	The goal, where the website stands today and what happens next — in five lines
2	What we will fix (high level)	The main fixes, why each matters to you, and who does it
3	What you will gain — next month and beyond	What you should see by the end of November 2026, and what takes longer
4	How the keywords will be used — and how you can check	Where the keywords go on the website, the outcome, and simple searches you can try yourself
5	Being found in AI assistants (AEO)	ChatGPT, Gemini, Perplexity and Claude — what we do and how to check
6	Being listed in more places	Google Maps, Justdial, Lybrate, Practo and others
7	Social media in brief	What we post, how often, and the words we use
8	What we will never publish	Dental advertising rules and the decisions we need from you
9	What we need from you	Access, facts and approvals
10	What you will receive every month	The monthly report and check-in
A–H	Appendices (technical reference)	Meta titles, full listing list, social kit, research, AI playbook, open items, 90-day timeline, version history

1. At a Glance

Topic	In short
Goal	Help more people in Chitlapakkam, Selaiyur, Sembakkam, Tambaram and nearby areas find Dr Divya's Phoenix Dental Care on Google, Google Maps and AI assistants — and contact the clinic.
Today	Website health score **54 / 100**. The website looks good, but Google is pointed to an old, broken web address; the home page loads slowly on phones; the contact form may not be delivering messages; the clinic is missing from several maps and directories.
What we do	Fix the website's search settings, use the right keywords on every page, list the clinic in the places patients look, and answer patients' common questions clearly.
Next month (November 2026)	Google sees the correct website and page titles; the clinic is on Google Maps, Bing and Apple Maps with the same details; tracking starts so we can report real numbers.
How you will know	Simple searches you can try yourself (Section 4.3) and a monthly report from us (Section 10).

> **An honest note on timing.** Google decides rankings, so no one can promise a position. Most changes show in Google within 1–4 weeks of being made; better positions build up over 2–3 months of steady work. AI assistants usually take longer.

2. What We Will Fix (High Level)

#	What we fix	Why it matters to you	Who
1	Point Google to the correct website address (drdivyaphoenixdental.com) on every page	Today Google is told the clinic's website is an old address that shows an error. Fixing this lets Google show and rank the real website.	Prodman Nexus
2	Clear page names and short descriptions for all 20 pages	This is the text people see in Google results. Clear, local wording (e.g. "Root Canal Treatment in Chitlapakkam") gets more clicks.	Prodman Nexus
3	Use the right keywords on every page	Each page is matched to what patients actually type, so Google knows which page to show for which search.	Prodman Nexus
4	Answer common patient questions on the website	Timings, Sunday visits, a child's first visit, treatment questions — Google and AI assistants quote pages that answer clearly.	Prodman Nexus
5	Put the clinic on Google Maps, Bing, Apple Maps and key directories (Justdial, Lybrate, Practo and more)	Most patients find a dentist through Maps and directories. The same name, address, phone and hours everywhere builds trust.	Prodman Nexus (with your approval)
6	Set up Google Search Console and Google Analytics	So we can see real searches, clicks and visits and show you progress each month.	Prodman Nexus (needs your access)

#	What we fix	Why it matters to you	Who
7	Renew the domain name and redirect the old web address	The domain expires on 13 Nov 2026; renewal keeps the site online. The old address will send visitors to the real site.	Prodman Nexus
8	Update the website's software and protections	Removes known security weaknesses.	Prodman Nexus
9	Make the contact form deliver every enquiry	Patients who fill in the form must reach the clinic.	UI/UX team (Akash)
10	Make the home page load fast on phones; easier-to-read colours; a Call / WhatsApp button that is always visible	A slow, hard-to-read page loses patients before they call.	UI/UX team (Akash)

The full, detailed list of issues is in Document 1 — Website Health Audit.

3. What You Will Gain — Next Month and Beyond

3.1 By the end of next month (November 2026)

Area	What you should be able to see	How you can check
Google shows the right website	Searching the clinic name shows drdivyaphoenixdental.com with the new page names and descriptions — not the old, broken address.	Search *Dr Divya's Phoenix Dental Care* on Google.
All pages known to Google	Every page of the website appears in Google's list.	Search `site:drdivyaphoenixdental.com` on Google and count the results (about 20).
On the map, everywhere	The clinic appears on Google Maps, Bing Maps and Apple Maps with correct hours, phone and photos.	Open each map app and search *Phoenix Dental Care Chitlapakkam*.
Listed in directories	Profiles on Justdial, Lybrate, Practo and the other approved directories, all with the same details.	Search the clinic name on each directory.
Real numbers start	Search Console and Analytics are recording searches, clicks, visits and calls — your first real figures arrive in the December report.	Our monthly report (Section 10).
Enquiries arrive (UI/UX team)	A test message from the website form reaches the clinic.	Send yourself a test enquiry once Akash confirms.
Faster home page (UI/UX team)	The home page opens in about 2–3 seconds on a phone instead of about 9.	Open the site on your phone, or test it at pagespeed.web.dev.

3.2 Over the next 2–3 months

What we expect	Why
The clinic's pages start appearing higher for local searches such as *dentist in Chitlapakkam*, *pediatric dentist in Chitlapakkam*, *root canal treatment in Chitlapakkam*.	Correct settings, the right keywords and consistent listings work together over time.
More calls, WhatsApp messages and direction requests from Google Maps.	A complete, active Google Business Profile with weekly posts and replies to reviews.
The clinic starts being mentioned when people ask AI assistants about dentists in the area.	Clear answers on the website plus consistent listings that AI assistants read.
A clear picture of what is working.	Monthly reports comparing searches, clicks, calls and positions with the month before.

We report what actually happens each month — including anything that has not moved yet.

4. How the Keywords Will Be Used — and How You Can Check

Keywords are the words patients type into Google, for example *"pediatric dentist in Chitlapakkam"*. Document 2 — Keyword Library lists 484 of them. This is how we will use them.

4.1 Where the keywords go

Step	What we do	Outcome for you
1 · One main keyword per page	Each of the 20 pages gets one main keyword and a few supporting ones (e.g. the Root Canal page → *root canal treatment in Chitlapakkam*).	Google understands exactly what each page is about and shows the right page for the right search.
2 · Page name and description	The keyword goes into the page name and the short description shown in Google (all 20 are written — Appendix A).	Your result looks clear and local, so more people click it.
3 · Headings, text and photo descriptions	The keyword appears naturally in the page heading, the first lines and photo descriptions — never stuffed.	Stronger match with patients' searches without sounding forced.
4 · Patient questions	Common questions are answered on the pages in simple words (e.g. *Is the clinic open on Sunday?*).	Pages can appear for question searches, voice searches and AI answers.
5 · Outside the website	The same keywords go into the Google Business Profile, directory profiles and social posts.	Google, Maps and AI assistants see one consistent clinic.
6 · Track every month	We follow the 12 priority keywords below and report their positions.	You see progress month by month.

4.2 The 12 keywords we will track every month

#	Keyword (what patients type)	Page it should bring them to
1	dentist in chitlapakkam	Home
2	dental clinic in chitlapakkam	Home
3	dr divya dentist chitlapakkam	Team
4	pediatric dentist in chitlapakkam	Pediatric Dentistry
5	pedodontist in chennai	Pediatric Dentistry
6	lady dentist in chitlapakkam	Team
7	root canal treatment in chitlapakkam	Root Canal Treatment
8	dental implants in chitlapakkam	Dental Implants
9	braces treatment in chitlapakkam	Braces Treatment
10	teeth whitening in chitlapakkam	Teeth Whitening
11	dentist in tambaram	Areas We Serve (new page)
12	dentist near me (searched around Chitlapakkam)	Google Maps listing

Starting positions will be recorded in the first monthly report (November), once Search Console is connected.

4.3 Check it yourself — simple searches

Use your phone's browser in a **private / incognito window** with location turned on, so the results are not personalised to you. Results can differ slightly by location and device.

What to check	How	When to expect a change
Your clinic shows with the right website	Search **Dr Divya's Phoenix Dental Care**. Check the web address (drdivyaphoenixdental.com), the page name and the description.	1–4 weeks after the fixes go live
All pages are in Google	Search **site:drdivyaphoenixdental.com** and see the pages listed.	1–4 weeks
Local searches	Search **dentist in Chitlapakkam**, **pediatric dentist in Chitlapakkam**, **root canal treatment in Chitlapakkam**. Note where the clinic appears — in the map box and in the results below it.	Gradual improvement over 2–3 months
Google Maps	Open Google Maps near the clinic and search **dentist near me** or **pediatric dentist**. Check the clinic appears with correct hours and the call button.	As soon as the Business Profile is verified; positions improve with reviews and posts
AI assistants	Ask ChatGPT, Gemini or Perplexity: **best dentist in Chitlapakkam, Chennai** and **Dr Divya's Phoenix Dental Care details**.	Usually 1–3 months or more

What to check	How	When to expect a change
Speed	Open **pagespeed.web.dev**, enter the website address, and look at the mobile score.	After the UI/UX team's image fixes

5. Being Found in AI Assistants (AEO)

More people now ask ChatGPT, Gemini, Perplexity or Claude questions like *"Which dentist in Chitlapakkam treats children?"*. These assistants look for clear answers on websites and for the same clinic details across Google, maps and directories.

What we do	Outcome
Answer patients' common questions on the website in plain words, with the answer first	Assistants can quote the clinic's own answers.
Show Dr Divya's qualifications clearly (BDS, MDS — Pediatric and Preventive Dentistry; adult and child dental surgeon)	Assistants can describe the doctor correctly.
Keep the clinic name, address, phone and hours exactly the same everywhere	Assistants trust and repeat the details.
List the clinic on Google, Bing and Apple Maps and the key directories	These are the sources assistants read most.
Ask the assistants 14 test questions every month and record the answers (Keyword Library §3.3)	You see whether the clinic is mentioned and whether the details are right.

AI assistants do not publish how they choose businesses, so we measure results rather than promise them. The technical checklist is in Appendix E.

6. Being Listed in More Places

Place	Why it matters	What we need from you
Google Business Profile (Google Maps)	The most important listing — Maps, the local results box and Google's AI answers	Manager access, clinic photos
Bing Places and Apple Business Connect	Bing, Microsoft Copilot, iPhone maps and Siri	Approval
Justdial, Sulekha	Large local directories used across Chennai	Approval; any paid plan is optional
Lybrate, Practo, Clinicspots, DocIndia	Doctor directories that already show up when people search for dentists in Chitlapakkam	Approval of Dr Divya's profile details
Facebook, Instagram, WhatsApp Business	Local awareness and the easiest way to book	Page / account access
LinkedIn and YouTube	Credibility for Dr Divya and short educational videos	Approval

Every listing uses the same details: **Dr. Divya's Phoenix Dental Care**, No 58/60, Ground Floor, Anna Street, Chitlapakkam, Chennai – 600064, +91 90032 26380, Monday–Saturday 9 AM–8 PM, Sunday by appointment. The full list of 25 places is in Appendix B.

7. Social Media in Brief

Topic	In short
What we post	Dental-care tips, children's dental health, how treatments work (step by step), meet the doctor and the clinic, timings and holiday hours.
How often	3–4 posts a week on Instagram and Facebook, 1 Google Business Profile post a week, LinkedIn and YouTube occasionally.
Words we use	Gentle, comfortable, child-friendly, for children and adults, explained step by step, Chitlapakkam, Tambaram.
Words we never use	Best, No. 1, top, guaranteed, 100% painless, cheapest, discount, free offer.
Example post	*A child's first dental visit should feel calm, not scary. Bring them in early — our team explains every step in a gentle, child-friendly way. WhatsApp us to book.*

Ready-to-use bios, hashtags, a weekly rhythm, sample captions and awareness days are in Appendix C.

8. What We Will Never Publish

Dentists in India follow the Dental Council's code of ethics. On **14 October 2026** the National Dental Commission advised all dentists against publishing patient testimonials and before/after photos, recording procedures, misleading claims and self-promotion. To protect Dr Divya's registration, we will **never** publish:

We will never publish	Instead we use
Claims that the clinic is "best", "top" or "No. 1"	Helpful information — for example a guide on *how to choose a dentist*
Patient testimonials, patient photos or names, before/after photos	Educational graphics, the doctor's introduction, clinic photos
Videos or photos of procedures	Simple diagrams, animations and short talking tips
Guarantees such as "100% painless" or "permanent results"	"Gentle", "comfortable", "designed to minimise discomfort"
Offers or discounts in titles, listings or posts	Plain information about services and timings

Decisions we need from you:

Decision	Why
Keep or remove the 3 patient testimonials currently on the website	The advisory cautions against publishing testimonials
Keep or remove the Home-page offers (free consultation, "Upto 700", referral)	Offers may count as solicitation under the rules
Confirm your designation wording and experience (7.5 years practice; 7.8 years teaching) — and whether the "10+ years" counter on the website should change	Qualifications must be shown exactly and accurately

We could not read the original regulation text; the advisory was reported by one news source. Please confirm with the Tamil Nadu Dental Council or your IDA branch before any paid advertising. Full detail: Appendix D.2.

9. What We Need From You

#	What	Why
1	Access for Prodman Nexus to **Google Search Console** and the **Google Business Profile** (and Google Analytics, when we set it up). You stay the owner.	To publish the Maps listing, see real searches and report real numbers
2	The email address and/or WhatsApp number where website enquiries should go	So Akash can connect the contact form
3	Your current timings, including Sunday, lunch break and holidays	Every listing must show the same, correct hours
4	The decisions in Section 8 (testimonials, offers, designation and experience wording)	So we can publish safely
5	A professional **photo of Dr Divya**, plus clinic photos (no patients)	Her photo goes on the doctor profile on the website and Google (today the site shows a drawing); clinic photos for the Maps listing and directories
6	Links to the clinic's **Instagram and Facebook pages**, if they exist (the current Instagram link on the site is an invite link, not the clinic's profile)	To connect them to the website, Google's clinic details and listings
7	Short answers to a few patient questions we held back: your first-visit routine, payment methods, parking, how often you advise a check-up, how long veneers and fillings usually last, the right age for braces, and your experience wording	So we can add these questions to the website accurately
8	What should happen to the old address phoenixdentalcare.in (we recommend redirecting it to the new website)	So no patient lands on an error page

Domain renewal (drdivyaphoenixdental.com, expires 13 Nov 2026) is being handled by Prodman Nexus on your behalf — no action needed from you.

10. What You Will Receive Every Month

In the monthly report	What it tells you
Website health score compared with last month	Whether the website is getting healthier
Positions for the 12 tracked keywords	Whether the clinic is moving up in Google for the searches that matter
Google searches, clicks and visits (Search Console, Analytics)	How many people found the website and how
Calls, direction requests and messages from Google Maps	How many people contacted the clinic from Maps
AI assistant check (14 questions)	Whether ChatGPT, Gemini and Perplexity mention the clinic correctly

In the monthly report	What it tells you
What we fixed this month and what is next	Clear progress and plan

The first report with real Search Console figures is planned for **December 2026** (covering November).

Appendices — Technical Reference

For the Prodman Nexus and UI/UX teams. You do not need to read these to follow the plan.

Appendix	Contents
A	Meta titles & descriptions for all 20 pages
B	Full list of 25 listing places
C	Social media kit — voice, words, bios, hashtags, weekly rhythm, captions, awareness days
D	Research, competitors and the full advertising-rules table
E	AI-search (AEO) and local ranking checklist
F	Open items and what is not yet verified
G	90-day timeline and measures
H	Version history

Appendix A — Meta Titles & Descriptions

Titles are under 60 characters and descriptions under about 155, so they are not cut off in Google. They use the clinic's real facts, the local keyword near the start, and no superlatives, offers or guarantees.

Page	URL	Recommended title (characters)	Recommended description (characters)	Main keyword

Also set for every page: a social-sharing image (1200×630 px), a unique H1 containing the main keyword, one canonical URL on `drdivyaphoenixdental.com`, and image alt text that describes the picture.

Appendix B — Where to List the Clinic (full list)

Use the same details on every listing. Divya to confirm the name; we recommend the spelling already used in the website footer:

Field	Standard text to use everywhere
Name	Dr. Divya's Phoenix Dental Care
Address	No 58/60, Ground Floor, Anna Street, Chitlapakkam, Chennai – 600064
Phone / WhatsApp	+91 90032 26380
Email	phoenixdentalc@gmail.com
Website	https://drdivyaphoenixdental.com
Hours	Monday–Saturday 9:00 AM–8:00 PM; Sunday by appointment
Categories	Dentist (primary); Dental clinic; Pediatric dentist; Cosmetic dentist — add others only if they match Dr Divya's qualifications and services
Short description	Gentle, modern and affordable dental care for children and adults in Chitlapakkam, Chennai — led by Dr. Divya S, BDS, MDS (Pediatric and Preventive Dentistry), adult and child dental surgeon and consultant paediatric dentist.

Facts only on every profile: name, qualifications, services, address, timings. No testimonials, before/after photos or offers (Section 8).

#	Platform / place	Type	Why it matters for Dr Divya	What to put on it	Cost	Priority
1	Google Business Profile	Maps & search	The single most important listing — Maps, the local pack and Google's AI answers	Primary category Dentist; services list (all 15 treatments); hours; photos of the clinic and team; Q&A; one post a week; WhatsApp and appointment links; service area	Free	P1
2	Bing Places for Business	Maps & search	Bing, Copilot and (reportedly) ChatGPT search	Import from Google; identical details	Free	P1
3	Apple Business Connect	Maps	Apple Maps and Siri for iPhone users	Same standard details; photos; hours	Free	P1
4	Justdial	Directory	India's largest local listing; strong in Chennai suburbs	Categories: Dentists, Pediatric Dentists, Dental Implants, Orthodontists (only if appropriate); standard details	Free basic listing; paid promotions optional — verify	P1
5	Lybrate	Doctor directory	Currently ranks for "dentist in Chitlapakkam"	Doctor profile: qualifications, services, clinic address, timings	Verify	P1

#	Platform / place	Type	Why it matters for Dr Divya	What to put on it	Cost	Priority
6	Practo	Doctor directory & booking	Large patient base that books online	Doctor and clinic profile; booking link	Verify (usually paid)	P2
7	Clinicspots	Clinic directory	Currently ranks for the local dentist search	Clinic profile	Verify	P2
8	DocIndia	Doctor directory	Currently ranks for Chennai dentist searches	Doctor profile	Verify	P2
9	Apollo 24|7	Doctor directory	Ranks for dentist searches in Chennai; check whether independent clinics can join	Doctor profile if eligible	Verify	P3
10	Sulekha	Local services	Local discovery in Chennai	Standard details	Verify	P2
11	Mappls (MapmyIndia)	Maps	Indian map app used in navigation	Standard details	Free	P3
12	Facebook Page	Social	Local awareness; reported as a review source Bing uses	Page with standard details, WhatsApp button, weekly posts	Free	P1
13	Instagram (Business)	Social	Visual, local reach; link in bio to WhatsApp	Business account, category Dentist, contact buttons	Free	P1
14	WhatsApp Business	Messaging	Easiest way for patients to book; QR code at clinic	Business profile, hours, greeting message, auto-reply, catalog of services (no prices unless confirmed)	Free	P1
15	LinkedIn — Dr Divya's profile and clinic page	Professional	Trust and credibility; referrals from doctors and schools	Headline, About, qualifications, clinic page	Free	P2
16	YouTube channel	Video	Educational videos and Shorts rank in Google and are cited by assistants	Doctor explainers (no procedure recordings); playlist per treatment	Free	P2
17	Tamil Nadu Dental Council register and Indian Dental Association (local branch)	Professional	Verifiable credentials and professional citations	Registration details; IDA membership if held	Per body	P2
18	Quora and Reddit (r/chennai)	Community Q&A	Answers to 'dentist in Chennai' questions can be cited by assistants	Helpful, honest answers with a disclosed profile — no promotion, no patient details	Free	P3
19	Facebook community groups, resident-welfare associations, apartment groups in Chitlapakkam, Selaiyur, Sembakkam	Local community	Direct local reach	Oral-health tips and awareness posts; follow each group's rules; no solicitation	Free	P2
20	Schools, pre-schools and day-care centres in the area	Local outreach	Fits Dr Divya's pediatric specialism	Oral-health talks and awareness material (check with the Dental Council that it is permitted)	Free	P2

#	Platform / place	Type	Why it matters for Dr Divya	What to put on it	Cost	Priority
21	Local newspapers' and magazines' health columns	Local press	Authority and citations	Dr Divya as an educational contributor	Varies	P3
22	Pediatricians and other doctors nearby	Professional referral	Steady, trusted referrals	Professional courtesy only — no commissions or incentives	Free	P3
23	Google Q&A and Google Posts	Within GBP	Gets common questions answered where patients look	Seed with the questions in Keyword Library §3	Free	P1
24	Website 'Areas We Serve' page	Own website	Ranks for each nearby locality	One genuine section per locality	Free	P2
25	Email signature, visiting card, prescription pad, QR code in clinic	Offline-to-online	Every patient interaction points to the website and the Google profile	Website, WhatsApp number, Google review link	Minimal	P2

Costs are not verified — confirm on each platform. Where the cost says "Verify", check for free plans before paying.

Appendix C — Social Media Kit

C.1 Voice

Do	Don't
Calm, caring, educational, local, family-friendly	Boasting, comparisons with other clinics, fear-based messages
Plain English (add Tamil greetings on festival days)	Medical jargon with no explanation
"Gentle", "comfortable", "explained step by step", "for children and adults"	"Best", "No.1", "top", "guaranteed", "100% painless", "permanent cure", "cheapest"
Ask people to **call, WhatsApp or book**	Offers, discounts, testimonials, patient photos, before/after, recorded procedures

C.2 Words that work

Purpose	Use these	Avoid
Trust	Qualified, BDS MDS, adult and child dental surgeon, consultant paediatric dentist, Associate Professor, experienced care, explained clearly, hygienic, step by step, neighbourhood clinic	Best, top, number one, leading, famous
Comfort	Gentle, comfortable, calm, relaxed, child-friendly, designed to minimise discomfort	Painless guaranteed, pain-free for everyone, no pain at all
Family	For children and adults, whole family, first dental visit, little smiles, healthy smiles	Cheap, discount, free, offer, lowest price
Local	Chitlapakkam, Tambaram, Selaiyur, Sembakkam, Rajakilpakkam, south Chennai, near you	Misleading distances or claims of being the only clinic

Purpose	Use these	Avoid
Action	Book, call, WhatsApp us, ask us, visit, check-up, consult	Hurry, last chance, limited slots
Education	Tips, myths, how it works, what to expect, aftercare, signs to watch for	Medical advice for a specific person in comments

C.3 Ready-to-use bios (Divya to approve facts)

Where	Text	Characters
Instagram bio (limit 150)	Dr. Divya S I BDS, MDS · Consultant Paediatric Dentist / Adult & child dental surgeon · Chitlapakkam / Mon–Sat 9–8 · Sun by appointment / WhatsApp ↓	142
Facebook short description	Dr. Divya's Phoenix Dental Care — gentle, modern and affordable dental care for children and adults in Chitlapakkam, Chennai. Led by Dr. Divya S, BDS, MDS, adult and child dental surgeon and consultant paediatric dentist.	221
LinkedIn headline (limit 220)	Dr. Divya S, BDS, MDS I Associate Professor I Adult & Child Dental Surgeon I Consultant Paediatric Dentist I Founder, Phoenix Dental Care, Chitlapakkam, Chennai	160

C.4 Hashtag sets

Set	Hashtags	How many per post
Local	#ChitlapakkamDentist #ChennaiDentist #TambaramDentist #SouthChennai #Chitlapakkam #Selaiyur #Tambaram #ChennaiDentalClinic	Instagram 5–8 · Facebook 2–3 · LinkedIn 3–5
Treatments	#RootCanalTreatment #DentalImplants #TeethWhitening #InvisibleAligners #BracesTreatment #LaserDentistry #SmileMakeover #GumCare #PreventiveDentistry #CosmeticDentistry	Pick the 2–3 that match the post
Children	#PediatricDentist #Pedodontist #PediatricDentistChennai #KidsDentist #ChildrensDentalHealth #HealthyBabyTeeth #FirstDentalVisit	Use on kids' posts
Education	#OralHealth #DentalCare #ToothCareTips #HealthySmile #OralHygiene #DentalAwareness	Use on tips and myth-busting posts
Brand	#PhoenixDentalCare #DrDivyaDentalCare	Every post

Set	Hashtags	How many per post
Tamil	#பல்மருத்துவர் #பல்பராமரிப்பு	Festival and awareness posts (check spelling)

C.5 Weekly rhythm (3–4 posts a week is enough; 1 Google Business Profile post a week)

Day	Theme	Format	Where	Example (compliant)
Monday	Educate	Carousel / graphic	Instagram, Facebook, LinkedIn	"5 signs it is time for a dental check-up"
Tuesday	Ask the dentist	Short text or talking-head video	Instagram, Facebook, YouTube Shorts	"Is a root canal painful?" — answer from the site's FAQ
Wednesday	Little smiles	Graphic / short video	Instagram, Facebook	"When should my child first visit the dentist?"
Thursday	How it works	Step-by-step graphic	Instagram, LinkedIn	"Root canal in six steps" (from the treatment page)
Friday	Local & community	Photo / text	Facebook groups, Google post	"Dental care tips for Chitlapakkam families"; holiday timings
Saturday	Meet the doctor / the clinic	Photo of team and clinic (no patients)	Instagram, Facebook, LinkedIn	"Meet Dr Divya — BDS, MDS (Pediatric & Preventive Dentistry), adult and child dental surgeon"
Sunday	Rest, or a gentle reminder	—	—	"Sunday appointments are by booking — WhatsApp us"

C.6 Sample captions (edit with Dr Divya)

Platform	Theme	Caption
Instagram	Kids	A child's first dental visit should feel calm, not scary. Bring them in early — our team explains every step in a gentle, child-friendly way. 🦷 WhatsApp us to book. #ChitlapakkamDentist #KidsDentist #FirstDentalVisit #PhoenixDentalCare
Instagram	Gums	Bleeding gums when you brush? It can be an early sign of gum disease, and early care makes treatment simpler. Come for a check-up. #GumCare #OralHealth #ChennaiDentist #PhoenixDentalCare
Facebook	Local	Dental check-ups for the whole family in Chitlapakkam. Open Monday to Saturday, 9 AM to 8 PM; Sunday by appointment. Call or WhatsApp +91 90032 26380.
LinkedIn	Authority	Why preventive dentistry matters: regular check-ups and cleaning catch small problems before they become complex. A short guide from Dr. Divya S, BDS, MDS (Pediatric and Preventive Dentistry), Chitlapakkam, Chennai.
Instagram	Root canal	Root canal treatment saves a natural tooth. It is done under local anaesthesia, usually in one or two visits. Swipe for the six steps. #RootCanalTreatment #ToothCareTips #TambaramDentist
Facebook / Instagram	Festival	Enjoying the festival sweets? Brush twice a day and rinse after sweets. Happy festival from all of us at Phoenix Dental Care! 🪔
YouTube Short	Tip	30-second tip: how to brush your child's teeth — Dr. Divya S explains in simple steps.
Google Business Post	Timing	Clinic open Monday to Saturday, 9 AM to 8 PM. Sunday by appointment. Book on WhatsApp +91 90032 26380.

C.7 Awareness days worth a post

Date	Occasion	Idea
20 March	World Oral Health Day	Check-up reminder; brushing tips for the family
14 November	Children's Day (India)	Kids' dental-health tips for parents
14 November	World Diabetes Day	Gum health and general health (the site's gum FAQ covers the link)
Early October	World Smile Day	Smile-care tips (no before/after)
Festival season (Diwali, Pongal, Tamil New Year)	Greetings and sweets-and-teeth tips	Warm greeting plus one simple tip
June	School reopening	Children's check-up reminder
Wedding season	Smile care before big days	Whitening and check-up information, no promises

Appendix D — Research, Competitors and Advertising Rules

D.1 Research and competitors

Source	What it gave us	Limit
The website's own content: 15 treatments, 50 FAQ questions, doctor profile, address, timings	Every keyword is tied to a service the clinic actually offers. Adjacent searches the site does not support are parked in a separate table (Keyword Library §2.11).	We only target what Dr Divya offers.
Live Google results for "dentist in Chitlapakkam Chennai" (checked October 2026)	Who and what ranks today: directories Lybrate, Clinicspots, DocIndia and Apollo 24|7, and clinics such as Clove Dental, Dr. Shalma Banu (also on Anna Street), Pandian's Multispeciality Clinic and Cute Smiles Family Dental Clinic.	Directory data can be outdated.
Dr Divya's background as provided by Sathish Kumar M (18 Oct 2026)	The credentials, specialty and experience keywords in Keyword Library §2.8 and the doctor-focused AEO questions.	Designation wording and experience figures to be confirmed by Divya before publishing.
How patients phrase searches in India: "near me", "open now", "cost", "painless", symptoms, Tamil and Tanglish	The behaviour-based lists in Keyword Library §2.5–2.7.	Modelled from search patterns, not measured.
Search volumes and the last 12 months of real searches	**Not verified — we do not yet have access to Google Search Console, Google Keyword Planner data or Google Trends exports for this site.**	We will re-rank every keyword with real data after Search Console access (planned next month).

Competitor snapshot (from directory listings; verify before relying on it):

Clinic / directory	What the listing shows	Opportunity for Phoenix Dental Care
Clove Dental (Chitlapakkam branch)	Chain; listed hours 10 AM–7 PM and closed Mondays	Target "dentist open on Monday" and later evening hours (Phoenix: Mon–Sat 9–8).
Dr. Shalma Banu A M (BDS)	Listed at Anna Street, Chitlapakkam	Same street — name consistency and strong Google Business Profile matter.

Clinic / directory	What the listing shows	Opportunity for Phoenix Dental Care
Pandian's Multispeciality Clinic	Listed 9 AM–9 PM	Compete on child-friendly and MDS-qualified care.
Cute Smiles Family Dental Clinic	Listed evening availability 5–10 PM	Evening demand exists; consider showing late-evening slots if Divya offers them.
Lybrate, Clinicspots, DocIndia, Apollo 24|7	Directories that currently rank for the local search	List the clinic on these so patients who land there find Phoenix too (Section 6 and Appendix B).

D.2 Advertising rules — full table

Dentists in India are bound by the *Revised Dentists (Code of Ethics) Regulations, 2014* (Chapter VI, Clauses 8.1–8.3 cover advertising, patient solicitation, publicity and signage). On **14 October 2026** the Ethics and Dental Registration Board of the National Dental Commission issued an advisory to all registered dentists, as reported by Medical Dialogues. Breaches may lead to a show-cause notice, suspension or removal from the dentist register. Everything below is built to stay on the safe side.

Topic	What the advisory cautions against	What we do in this plan	Decision for Divya
Patient testimonials & before/after photos	Publishing them	None in meta text, posts or ads. Use educational graphics, the doctor's introduction and clinic hygiene photos instead.	**Important:** the website currently shows 3 testimonials on Home and every treatment page. Please confirm whether to keep them (see note below).
"Best", "No.1", "top" about the clinic	Self-aggrandising publicity and misleading claims	"Best dentist in Chitlapakkam" is what *patients type*, so we target it with helpful pages (e.g. *How to choose a dentist*), but never call the clinic best. Titles and posts use "gentle", "family", "child-friendly".	Approve wording.
Recording / broadcasting consultations and procedures	Cautioned against	No procedure videos or reels. Use animations, diagrams and talking-head tips.	—
Offers and discounts ("free consultation", "Upto 700 off", referral rewards)	Not named in the advisory, but covered by the solicitation clauses	Offers are kept out of titles, descriptions and social posts until confirmed.	Check the offers on the Home page with the Tamil Nadu Dental Council / IDA.
Health claims ("100% painless", "permanent cure", "guaranteed")	Misleading treatment claims	Use "gentle", "comfortable", "designed to minimise discomfort". No guarantees, no results promises.	Approve wording.
Large signboards	Disproportionate signboards	Not part of the digital plan.	Keep clinic signage modest.
Qualifications, designations and experience	Not cautioned against when factual; misleading or inflated claims are	Show BDS, MDS, Associate Professor, Adult and Child Dental Surgeon, Consultant Paediatric Dentist exactly as Divya approves. State experience as two separate facts (7.5 years practice, 7.8 years teaching) — never add them into one bigger number.	Confirm the exact designation wording and whether the site's "10+ years" counter should change.

> **What this changes in the audit report.** Three suggestions in the health report should be **put on hold until Divya confirms**: showing more real patient reviews on the website (A5), the before/after gallery (U10), and the "real reviews" row in the action plan. We will also review the existing testimonials on the site.

> **Confidence note.** The advisory is reported by one news outlet; we could not read the original text of Clauses 8.1–8.3. Please ask the Tamil Nadu Dental Council or your IDA branch to confirm what is permitted before any paid advertising or social-media launch.

Appendix E — AI-Search (AEO) and Local Ranking Checklist

No platform publishes how it chooses businesses, so the evidence below is from industry reports and Google's own guidance. We will test and record results monthly rather than assume.

#	Action	Why	Helps	Priority
1	Complete and verify Google Business Profile (categories, services, hours, photos, Q&A, weekly posts)	Google says its AI features are built on its core search systems; local data from the profile is widely reported to feed AI answers and Maps	Google, Maps, Gemini, AI Overviews	P1
2	Claim Bing Places (import from Google) and set up Bing Webmaster Tools with IndexNow	ChatGPT search is reported to use Bing-based data; Copilot uses Bing	ChatGPT, Copilot, Bing	P1
3	Claim Apple Business Connect	Apple Maps, Siri and iPhone search	Apple devices	P1
4	Use exactly one clinic name, address, phone and hours everywhere	Conflicting details make assistants omit or distrust a business (vendor-reported)	All	P1
5	Put direct, short answers at the top of each treatment page, with FAQ structured data	Easy for assistants to quote	All AI assistants	P1
6	Add Dr Divya's credentials, registration number (if she agrees), photo and 'last reviewed' date to treatment pages	Shows who is responsible for the advice — important for health topics	Google, all assistants	P1
7	Add `Dentist`, `Physician`, FAQ, breadcrumb and `sameAs` links in structured data	Helps machines connect the website, the profile and the doctor	Google, all assistants	P2
8	Keep AI and search crawlers allowed (Googlebot, Bingbot, OAI-SearchBot, GPTBot, ClaudeBot, PerplexityBot)	Blocked pages cannot be quoted. Already allowed today	All	P1
9	Get listed on the directories that already rank locally (Lybrate, Clinicspots, DocIndia, Justdial, Practo)	Aggregator listings are frequently cited by assistants (vendor-reported)	Perplexity, ChatGPT	P1
10	Publish helpful local content: 'How to choose a dentist in Chitlapakkam', 'Dental care for children', Areas We Serve	Targets 'best dentist' searches without self-praise; gives assistants local context	Google, all assistants	P2
11	Add `llms.txt` (clinic summary and key links)	Low cost; evidence that assistants use it is limited, so treat it as optional	Some assistants	P3
12	Run the monthly AI test list (Keyword Library §3.3) and record results	The only reliable way to know whether it is working	All	P1

Appendix F — Open Items and What Is Not Verified

Item	Status	What is needed
Search volumes and 12-month search history for each keyword	Not verified	Search Console access and Keyword Planner check (next month)
Exact text of Clauses 8.1–8.3 and the 14 Oct 2026 advisory	Not verified (one news report)	Ask the Tamil Nadu Dental Council / IDA; Divya's decision on testimonials and offers
Directory costs and eligibility (Practo, Lybrate, Apollo 24|7, Justdial)	Not verified	Check each platform before paying
Competitor details (hours, services)	From directory listings only	Re-check before using in any copy
Tamil spellings	Not verified	Native Tamil speaker to check
Nearby localities as the real patient catchment	Not verified	Divya's patient addresses and Search Console data
Whether ChatGPT, Gemini, Perplexity and Claude mention the clinic today	Not run	Run the 14 prompts in Keyword Library §3.3
Dr Divya's designation wording and experience figures (7.5 years practice, 7.8 years teaching) vs the site's "10+ years" counter	Provided 18 Oct 2026; not yet confirmed for publishing	Divya to confirm exact wording
Clinic facts: lunch break, parking, payment methods, first-visit process, registration number	Missing from the site	Divya to supply

Sources used for research: live Google results for the local dentist search; Medical Dialogues report on the National Dental Commission advisory (14 October 2026); the Revised Dentists (Code of Ethics) Regulations, 2014 (Tamil Nadu Dental Council copy); industry articles on local and AI search; Wikipedia and property portals for nearby localities.

Appendix G — 90-Day Timeline and Measures

When	What	Owner	Result
This month (SEO)	Approve the keyword map; update meta titles and descriptions; fix the website addresses (audit T1–T3); set up the Areas We Serve page	Prodman Nexus (Sathish)	Pages tell Google clearly what they are about
This month	Claim and complete Google Business Profile, Bing Places, Apple Business Connect; standardise name, address, phone	Prodman Nexus with Divya's approval	Consistent details across maps
This month	Create Justdial, Lybrate, Practo, Clinicspots, DocIndia, Sulekha profiles	Prodman Nexus	Presence on the directories that already rank locally
This month	Divya approves compliance decisions (Section 8) — testimonials, offers, wording	Dr Divya	Safe to publish
Next month (Search Console starts)	Verify Search Console and GA4; submit the corrected sitemap; capture the baseline	Prodman Nexus	A real baseline of searches and clicks
Next month	Re-rank all keywords using real Search Console data; add the new FAQs; start social posting rhythm	Prodman Nexus + Dr Divya	Data-led keyword priorities

When	What	Owner	Result
Month 3	Publish 2–4 helpful pages (How to choose a dentist, children's dental care, Areas We Serve); first monthly AI test	Prodman Nexus + Dr Divya	More pages that can be found and quoted
Every month	Report: rankings for the top 20 keywords, Search Console clicks/impressions, Google profile calls and directions, AI test results	Prodman Nexus	Clear progress report

What we measure (baseline set once access is given — **Not verified today**):

Measure	Where	Direction we want
Impressions and clicks for Chitlapakkam and nearby searches	Google Search Console	Up each month
Average position for the 20 priority keywords (P1)	Search Console / rank tracker	Moving towards page 1
Calls, direction requests and website clicks from Google Business Profile	Google Business Profile	Up each month
WhatsApp and form enquiries	WhatsApp Business / contact form	Up each month
Mentions in AI answers (Keyword Library §3.3)	Manual monthly test	Clinic named, details correct
Directory and map listings complete and consistent	Checklist (Appendix B)	100%

Appendix H — Version History

Change (version 2, 18 Oct 2026)	Detail
Dr Divya's background added	BDS, MDS; Associate Professor; Adult and Child Dental Surgeon; Consultant Paediatric Dentist; 7.5 years hospital & clinic practice; 7.8 years in dental college. Keyword Library §2.8 (42 keywords).
Services re-checked against the website	Procedure and benefit wording from every treatment page (e.g. root planing, abutment, digital smile assessment, fluoride application). Keyword Library §2.9 (54 keywords).
Meta updated	Home, Team and Pediatric Dentistry titles/descriptions now carry the credentials (Appendix A).
AEO, bios and listings updated	5 new questions about Dr Divya (Keyword Library §3.2), 2 new AI test prompts, updated bios and listing description (Appendices B–C).
Split into three documents (24 Oct 2026)	The keyword library and AEO questions moved to **Document 2 — Keyword Library** (keyword-to-page map: §2.10). This plan keeps the strategy.
Version 3 — client edition (24 Oct 2026)	Rewritten for the clinic: index, high-level fixes, gains for next month, keyword implementation and self-check searches; technical material moved to appendices.
