Task 5 — Before and After: Patient Questions (FAQs) on Key Pages

Prepared by	Prepared for	Website	Status
Prodman Nexus Solutions — Sathish Kumar M	Dr Divya S	https://drdivyaphoenixdental.com	For review — development copy of the site, not live yet

What this task did: added a short *Frequently Asked Questions* section to 4 pages (10 questions in total), in the same style as the existing treatment-page FAQs, and told Google about them behind the scenes. Answers use only facts already on the website. Nothing else on the pages changed.

Summary

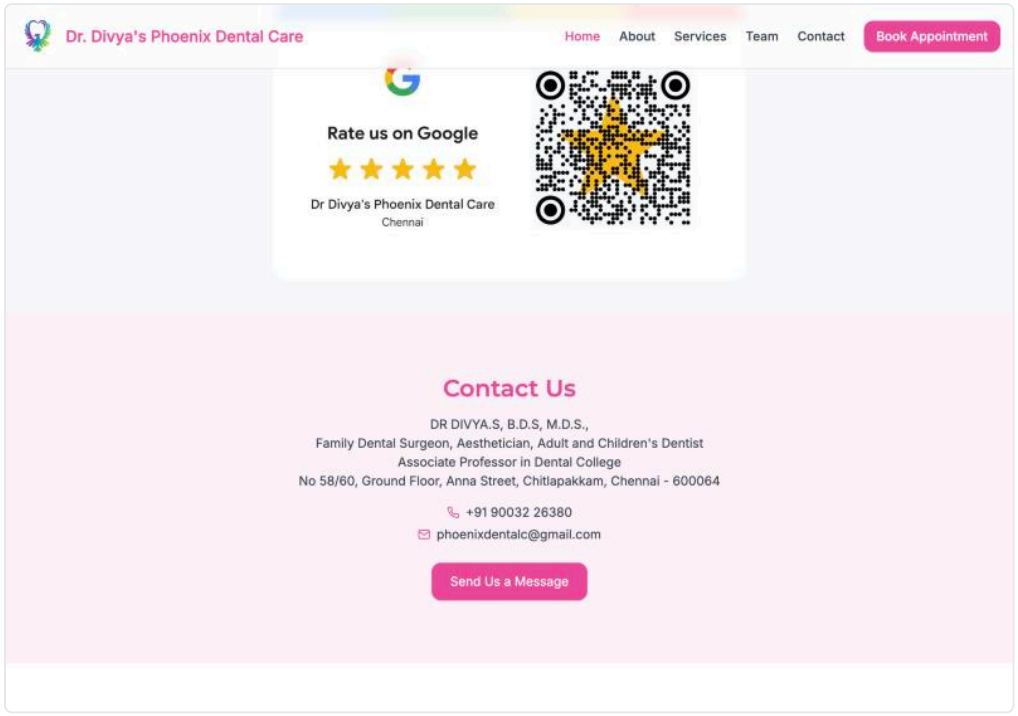

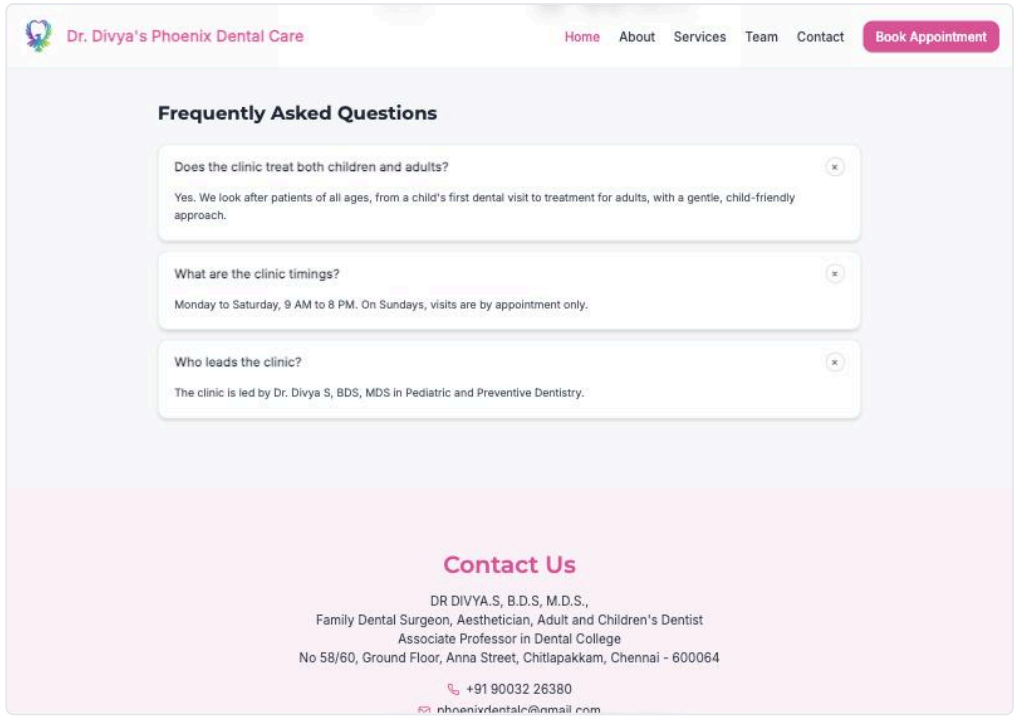

#	Page	Questions added	Where it appears
1	Home	3	New section above *Contact Us*
2	Contact	2	New section below the contact form
3	Team	3	New section between the doctor card and the booking box
4	Tooth Replacement	2	New section after *About Tooth Replacement Solutions*
	Total	**10**	

Checked: all 10 questions appear on the pages and match Google's FAQ data; page titles, descriptions and headings unchanged; works on a phone (see Team page, last section).

Held back until Divya replies: first-visit routine, payment methods, parking, check-up frequency, how long veneers and fillings last, the right age for braces, and experience wording. These are on Divya's action list.

> **Updated after review:** the FAQ sections first added to Preventive, Cosmetic and Restorative Dentistry and Orthodontics were removed at Sathish's request. Tooth Replacement, Home, Contact and Team keep theirs.

Questions and answers added (new section between the doctor card and the booking box):

Question	Answer
What are Dr. Divya S's qualifications?	Dr. Divya S holds a BDS and an MDS in Pediatric and Preventive Dentistry. She is also an Associate Professor in a dental college.
Is Dr. Divya a pediatric dentist?	Yes. Her MDS is in Pediatric and Preventive Dentistry, and she is a consultant paediatric dentist (pedodontist) who works with children of all ages.
Does Dr. Divya treat adults as well as children?	Yes. As an adult and child dental surgeon, she treats patients of all ages.

Tooth Replacement

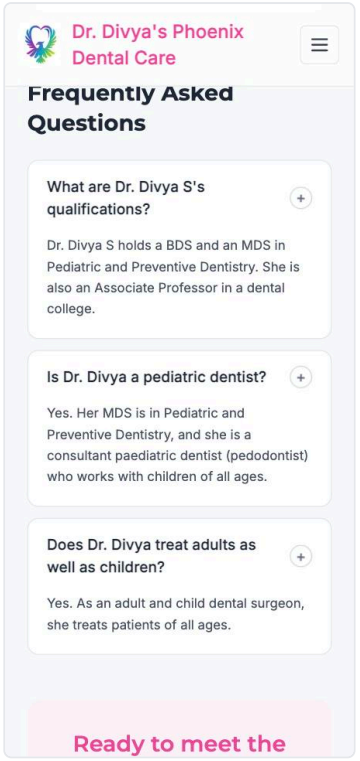

Before	After (answers opened for review)
	

Questions and answers added (new section after *about tooth replacement solutions*):

Question	Answer
Dentures, bridge or implant: what is the difference?	Dentures are removable replacement teeth. A bridge is fixed in place and supported by the neighbouring teeth. An implant replaces the tooth root with a titanium post that holds a crown, without relying on the neighbouring teeth.
Why replace a missing tooth?	A missing tooth can affect chewing, speech and confidence. Replacing it helps restore comfort and function.
